

Stoner Molding Solutions

You Mold It. We Release It.

They say time is money but for FRP molders using paste wax, it has been challenging to save time applying and removing paste wax. Not much has changed for over 50 years! That was until revolutionary new Stoner Hydro Speed!

Stoner Hydro Speed is:

- Water based
- Low VOC
- High solids
- Sprayable (can't do that with paste wax)
- Tremendously time/labor saving: saves 50-80% on wax application/removal labor!

SAVE TIME AND MONEY WITH HONEY WAX® HYDRO SPEED!

Introducing Honey Wax Hydro Speed, the first water-based hi-solids, non-flammable release solution for composite molders. Honey Wax Hydro Speed is a revolutionary advancement in wax based release agent technology. Hydro Speed is 100% non-hazardous and 100% non-flammable. It can be applied by hand or with an H/LP spray system.

The biggest and most exciting aspect of Honey Wax Hydro Speed is the significant labor savings achieved during the application and removal. When compared to other commercially available paste wax release agents, molders can expect an average labor savings of 50% to 80% when using Honey Wax Hydro Speed.

Save Time

Tested on a 9 sq ft mold surface.

Product	Seconds to Apply	Seconds to Remove
Honey Wax Hydro Speed (Hi-Speed)	8.0	13.0
Honey Wax Hydro Speed (Regular)	21.0	23.0
TR 102 Regular (Hi-Temp)	28.0	42.0
TR 104 Hi-Temp (Hi-Temp)	28.0	54.0
Megalon M-8 (Hi-Temp)	32.2	70.0

Compare Labor Costs

Product	Labor Expense*
Honey Wax Hydro Speed (Hi-Speed)	\$32.96
Honey Wax Hydro Speed (Regular)	\$27.36
TR 102 Regular (Hi-Temp)	\$43.21
TR 104 Hi-Temp (Hi-Temp)	\$50.62
Megalon M-8 (Hi-Temp)	\$63.09

*Calculated by multiplying #320 sq. in. x application time

Check out this amazing new video that tests Stoner Hydro Speed side by side with most popular paste waxes.

HONEY WAX® HYDRO SPEED

- Faster to Apply
- Faster to Remove
- Water Based
- Non-Flammable
