derakane™ signia™

get acquainted with **derakane™ signia™**

Introducing derakane™ signia™, Ashland's new signature formula, incorporating the best features of our legacy resins while continuing to elevate the industry through signia™'s modern list of features and benefits. derakane™ signia™ brings something for everyone... everywhere.

in the shop

- **improved shop efficiency** — formulated to provide an **easy prep** surface, increased secondary bonding and **reduced gassing** for faster consolidation and less process time
- **low styrene emission** — prepared with an innovative styrene suppressant system to reduce emissions, extend permits, and provide a low odor environment
- **longer shelf life** — delivered with extended shelf life to maintain processing characteristics

in the field

- **identical backbone** — built with unchanged polymer chemistry to deliver the same corrosion properties, mechanical properties and better processing
- **verifiable Identification** — unique, proprietary detection system to now verify the integrity of your design wherever corrosion-resistant fiberglass reinforced plastic (FRP) pipes and tanks are specified

with the same science, support and solvers behind the brand you trust — original, true, and trusted just became undeniable and verifiable — derakane™ signia™

We are always solving™.
